

## 99.5% H-1B APPROVALS FOR 2022 FILINGS FOR OUR CLIENTS

Get the Right Advice

### OVERVIEW

**2022 was full of immigration challenges, particularly backlogs. Demand for the H-1B visa returned to pre-pandemic levels, resulting in demand exceeding supply.**

### BACKGROUND

2021 saw low H-1B filing rates due to the pandemic. 2022 proved demand is back. USCIS received 483,927 registrations for the 85,000 available spots. The H-1B lottery was completed in the first round.

**Though competitive, ILBSG saw an even higher approval rate than in prior years, with 99.5% of our filings approved.**

### OUR APPROACH

Once again, ILBSG's attentive and detailed approach maximized results for our clients.

USCIS guidelines specify required documentation for the initial filing. We go a step further.

**We file petitions with extensive supporting evidence to meet all eligibility requirements and eliminate complications, such as RFEs. Our approach continues to see high approval rates.**

### RESULTS

Based on our thousands of H-1B cap cases, ILBSG proudly reports:

- **99.5% approval rate for finalized cases.**
  - 97% of filings have been adjudicated to a final decision by USCIS.
  - 68% of these filings were approved by USCIS as filed, without a RFE or inquiry.
  - 28% of these filings were approved after RFE.
  - Only 3% remain pending.
- **98% approval rating for our RFE responses**
  - For filings where RFEs were requested, ILBSG continued to see a high approval rating. To date, less than .5% of our submissions were denied.

*Whether your company has hired H-1B employees previously or not, we can help. Our results validate our approach.*
